

## Progress Report

**Name:** Chioma Jessica Nkem-Eze  
**Course:** Simulink Onramp  
**Progress:** **100%** complete (as of 15 May 2022)

### Chapters

- |   |             |                                     |             |
|---|-------------|-------------------------------------|-------------|
| 1. Course Overview                        | <b>100%</b> | 12. Project - Modeling a Thermostat | <b>100%</b> |
| 2. Simulink Graphical Environment         | <b>100%</b> | 13. Project - Peregrine Falcon Dive | <b>100%</b> |
| 3. Inspecting Signals                     | <b>100%</b> | 14. Conclusion                      | <b>100%</b> |
| 4. Basic Algorithms                       | <b>100%</b> |                                     |             |
| 5. Obtaining Help                         | <b>100%</b> |                                     |             |
| 6. Project - Automotive Performance Modes | <b>100%</b> |                                     |             |
| 7. Simulink and MATLAB                    | <b>100%</b> |                                     |             |
| 8. Dynamic systems in Simulink            | <b>100%</b> |                                     |             |
| 9. Discrete systems                       | <b>100%</b> |                                     |             |
| 10. Continuous systems                    | <b>100%</b> |                                     |             |
| 11. Simulation Time                       | <b>100%</b> |                                     |             |
